NOTE:

Thank you for purchasing this Acue Lighting product. This product has been tested and checked by our quality control department before it was shipped out of the factory. All users should strictly abide by the warnings and instructions stated in this manual, any damage caused by misuse or neglect of the information in this user manual will exclude the product from the warranty as well as remove the manufacturer from any responsibility of repair or damages. The information in this manual is subject to change without prior written notice.

1. PRODUCT SPECIFICATIONS

Thank you for choosing this Acue Lighting product. This product uses standard DMX512 signal protocol and also supports RDM protocol.

Production enforcement standard IEC 60598-1:2014, IEC60598-2-17:2017.

DMX Channel modes: 37/41CH

Light Source: 600W White LED Engine

Lamp Life: 20000 hours

Light Source Luminous Flux: 30,000

Power Input: AC 110-240V,50/60Hz

Total Power Draw: 800W

Display: 2.8 inch screen display, supports 180° display rotation when hanging

Color Wheel: 7 fixed colors + white + CRI .CT:2800-5600K

Fixed Gobo Wheel: 8 gobos + open.

Rotation Gobo Wheel: 6 replaceable gobos + open

Prism: 4-facet prism

Frost: Linear frost filter

Beam Angle : 6-50°zoom range

Dimmer: 0-100% linear dimming control

Iris: adjustable iris control

Framing: 4 flag system with 180°rotation

DMX: 3 & 5 pin XLR connectors for input and output: supports RDM and software update

Locking System: magnetic position lock system

Pan : 540°; 8Bit/16Bit

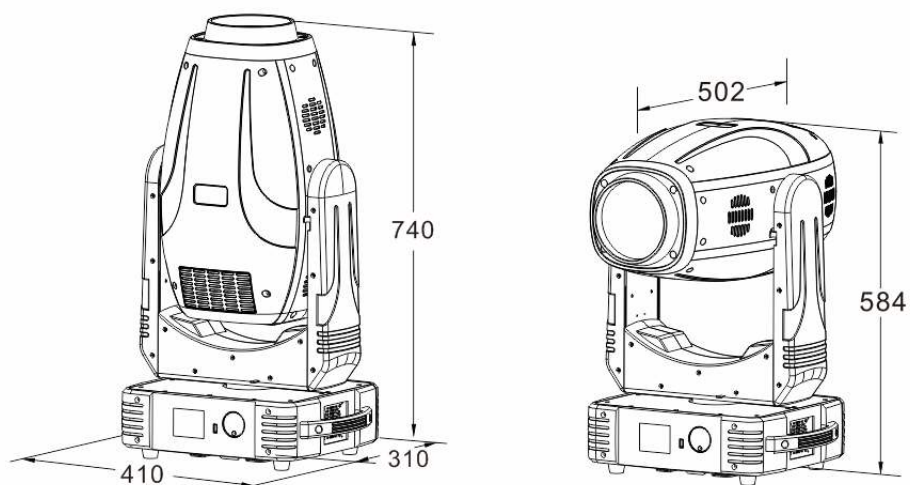

Tilt : 270°; 8Bit/16Bit

IP Rate: IP20;

Net Weight: 32KG / 70.5 Lb

2. FIXTURE SIZE

Product size: 410 (L) × 310 (W) × 740 (H) mm

3. PARTS INTRODUCTION

- 01 — Control panel
- 02 — USB Port
- 03 — Button

- 01 — DMX In
- 02 — DMX Out
- 03 — Power switch
- 04 — Power in
- 05 — Fuse

4. Color, CMY, & GOBO wheels,

Color wheel: 5 fix color + white + CRI . CT:2800-5600K

Fixed GOBO Wheel : 8 GOBOs + Open

Rotating GOBO Wheel: 6 GOBOs + Open.

5. SAFETY INFORMATION

5.1.1 SAFETY WARNING MESSAGE

1. This fixture is meant for professional use and is not intended to be used by non-qualified individuals. After opening the packaging, please check the package for damages caused by transportation. If there is any damage, do not use this fixture, and please contact the dealer or manufacturer as soon as possible.

2. This product is only suitable for indoor use as it has an IP20 protection class rating. Fixture should be kept dry to avoid damage caused by moisture. Moisture can cause overheating or electrical fires. Do not use in dusty environments for long periods of time as the dust will clog the cooling mechanism resulting in damage to the fixture. Prevent the fixture from coming into contact with water or any other liquid. The user of this product should know that misuse can cause fire, high heat, electric shock, ultraviolet radiation, damage to light source, which all can cause serious or fatal injuries.

5.1.2 READ MANUAL CAREFULLY BEFORE USE OR INSTALLATION

1. Follow through this user manual section of security methods and pay attention to the warning signs on the fixture.
2. If you have any problem or are unsure how to safely operate the equipment, please contact your dealer.

5.1.3 OPERATION WARNINGS

The above symbol specifies that the unit is in automatic mode. Manual operation is disabled. Do not manually force the equipment or try to touch the moving parts of the fixture.

5.1.4 POINTING IS PROHIBITED

Never point the lights directly to the sun or other strong light source.

5.2 MAKE SURE TO MOUNT FIXTURE SECURELY

1. Please don't move the package by one person only.
2. When hanging the fixture, you must verify that the structure you are hanging or securing the fixture to is able to withstand 10 times the weight of the fixture.
3. You must make sure the mounting hardware is strong enough to handle the weight of the fixture and shows no sign of any damage. Make sure to properly secure a safety cable to the fixture before completing the installation.

5.3 UV PROTECTION

1. Avoid directly looking into the light beam to avoid UV damage to eyes
2. Do not operate the equipment without the front objective lens; The lens and the fixture covers should be immediately replaced if any damage is present.

5.4.1 PROPER WORKING TEMPERATURE (Rated maximum ambient temperature)

Maximum working temperature is 40°C

Please don't use the equipment if the temperature above 40°C.

5.4.2 HIGH HEAT WARNING (Maximum outer surface temperature)

$$t_c = 110^\circ\text{C}$$

When the luminaire reaches the state of thermal stability, the maximum temperature on the external surface can reach 110 degrees. Please do not touch the lamp body when the luminaire is working.

5.5 IP PROTECTION

This product is certified at IP 20 levels only. Adequate additional precaution should be taken for outdoor use. All lamps, lights and their fittings should be kept dry. Overheating, dust and excessive humidity must be avoided.

5.6 BURST PREVENTION

1. The lens should be changed if damaged, cracked or has any other problems.
2. Only replace with original lens from manufacturer.
3. Lens size: $\varnothing 168*52\text{mm}$.

5.7 PREVENTION OF ELECTIC SHOCK

1. All electrical connections must be carried out by a qualified individual.
2. Before installing, make sure you use the power outlet has the proper voltage. Avoid using long cable runs to assure proper voltage without any drops
3. Each fixture must be properly grounded
4. Disconnect power before attempting to replace a fuse.

5.8 MAINTENANCE

Before starting any maintenance work or cleaning the fixture, make sure to cut off the power from the mains. After switching off, do not disassemble the luminaire for at least 10 minutes in order to avoid burns.

5.9 PRECAUTION TO PREVENT ELECTRICAL SHOCK OR FIRE

1. Please do not operate fixture near any flammable surfaces or materials.
2. Make sure when replacing a fuse to use the specified type of fuse.
3. The equipment must be installed away from flammable and explosive materials. The shortest distance between the equipment and the flammable material is 3M.
4. The fixture should be projected a minimum of 15 meters away from flammable objects.
5. Fan or ventilation ports should not have any obstructions
6. Do not place any object on the lens.
7. Allow the device to cool for 20 minutes prior to touching the body or moving the fixture after long periods of use.
8. Do not use aftermarket accessories with this fixture.

6. PACKAGING

This fixture is sold either in flight cases or carton boxes. Each fixture comes with the following:

6.1 ACCESSORIES

CONTENT	QUANTITY
User Manual	1
Power Cable	1
Safety Cable	1
Clamps	2
Omega Bracket	2

6.2 TRANSPORT PROTECTION LOCK

In order to protect the fixture, the fixture is equipped with a pan/tilt locking mechanism. During transport in a road case, the pan must be locked in the center position, and the fixture head must be locked in vertical state.

6.3 PACKAGING AFTER USE

1. Before packing the fixture, make sure the fixture is allowed to cool for 20 minutes before placing in road case.
2. Before cleaning the fixture, make sure X, Y axis protection lock is disengaged.
3. Make sure to pick up the fixture using both handles. Place the product into the flight case up side down.
4. After packing the fixture, place the accessories into the accessory compartment, then close and lock the flight case.
5. Flight cases should only be stacked up to two layers to prevent tipping over.

6.4 UNPACKING

Note: Before unpacking check if packaging is damaged due to transportation. If you find any physical damage please do not use this item, and contact the dealer or manufacturer as soon as possible.

7. INSTALLATION

7.1 INSTALLATION OF RIGGING

The product can be placed on the stage or mounted on any supporting frame. The quick locking system can quickly and easily mount in 2 directions.

7.2 RIGGING EQUIPMENT

1. Before installation, it is necessary to verify that the fixture clamp brackets are not damaged and can bear at least 10 times the weight of the equipment. Then verify if the structure being mounted to can bear the weight of at least 10 times the total weight of the fixture. Always use

- a safety cable to secure the fixture to the mounting surface as secondary precaution.
2. Mount the supplied hanging bracket to the base of the fixture body, inserts the fastener into the locking holes of the base, and turn the handle of the fastener 1/4 turn clockwise to lock in place. Inspect the bracket to make sure it is securely mounted to the fixture.
 3. Install a safety cable that can withstand 10 times the weight of the equipment.
 4. Before powering the fixture on make sure the locking mechanism has been disengaged.
- Make sure there are no combustible materials in at least a 3-meter radius to where the fixture is mounted.

Attention !

Fixture must be secured with 2 clamps and a safety cable for safe operation.

7.3 FIXTURE CONNECTION

Attention !

1. One product only can accept one input one output.
2. The data input protocol is DMX via the means of a 3 pin/ 5 pin XLR socket as follows.
 - Pin 1: + polarity signal
 - Pin2; - polarity signal
 - Pin3: Ground
3. DMX cable being used must be shielded twisted pair cable; standard loudspeaker cable is not reliable to control the long-range data. 24AWG cable is suitable for more than 300-meter long-distance runs. Add DMX 512 signal amplifier where needed

8. AC POWER

8.1 VOLTAGE, POWER, FUSE SPECIFICATION

Input Voltage	Total Power	Frequency
110-240V	800W	50/60HZ

Fuse voltage	Electronic current	Specification
250V	10A	5×20

8.2 POWER PROTECTION

Make sure to check if mains cables are not damaged and connectors are properly tightened before connecting to fixture or mains. If cable is damaged you must replace it immediately.

ATTENTION !

Factory has included a standard 3-pin plug socket. If fixture cable is damaged, replacement cable should be connected in the following order. Any question, please contact professionals or talk to a qualified electrician.

Live wire (L)	Null (N)	Ground wire	
White	Black	Green	

9. LED LAMP SPECIFICATIONS

9.1 LED LAMP

LED LAMP MODEL	POWER OF LAMP	LIFE/HOUR	Lumen
600W White LED Engine	600w	20000 HOURS	30000Lux

9.2 LED LAMP REPLACEMENT

9.2.1 The light source of this luminaire is NOT a user replaceable light source. If it is damaged, please send it to the manufacturer or the closest certified service provider.

10. Warranty period

10.1 The fixture comes with a 1-year warranty manufacturers warranty, which covers only manufacturers defects.

11. CONTROL PANEL

The control panel has a user-friendly touch screen to display the operation data and other information.

There are four buttons on the right side.

Each button has a dedicated function.

Top button is for upward movement, lower button is for downward movement. The left button is for exiting the selected function where the right button is for confirming the function or data.

14. ROUTINE MAINTENANCE

Cleaning and Maintenance

Warning:

1. Turn off the power before opening any cover.
2. Dust can be blown gently with a vacuum cleaner or a pressurized air blower machine.
3. In order to ensure the fixture can work normally, it should always be kept clean. It is recommended that the fans and ventilation inlet should be cleaned every 15 days. The lens and dichroic color filters should also be regularly cleaned to maintain an optimum light output. Do not use any type of solvent on dichroic color filters. It will damage the color filters.
4. Recommended: The continued usage of the light should not exceed 4 hours or it will shorten the life of the lamp.
5. Disconnect the power supply before beginning any maintenance on the fixture. Let the parts cool down for 10 minutes then proceed to open the covers.
6. Inspect the lens and all moving parts for damage after opening covers. Avoid touching any internal parts if there is a presence of static electricity.
7. This fixture is equipped with a powerful cooling system. It is easy for dirt to be collected on the fans and vent ports. Clear all vent holes of dust.
8. Check the vent holes for blockages to avoid damage to the cooling system after every use.
