

ME-500

NETWORKED PERSONAL MIXER

The ME-500 personal mixer is a small 16 mono/stereo channel mixer with a mono/stereo or headphone output.

The LED display provides level and signal information.

The ME-500 is connected by standard Cat5e Ethernet cabling and can be distributed thru standard IT hardware.

16 buttons provide a single mono or stereo audio channel.

The ME series can be used for audio distribution (break out rooms, translation, dressing rooms etc) or as a personal monitoring system for musicians.

The ME range is compatible with SQ, Qu, ME-U (Dante, Madi, etc) and the dLive series.
